Capt Curtis Shaw: 12 white
4 Fancy

Messrs Rice & Kendall,

Water St. Boston are
the persons with whom I
have contracted for papers,
(the kind) papers & Fancy
covers.

Both I shall
make to special orders
and a good large lot
at a time, in order to make
them & it, as reasonable
terms - Mr. Shaw may
refer them to me, for the
patterns of the article wanted.
(if he takes my size and
quality); or, under his
instructions I will get

their terms, and order
for him.

By the Ft. I expect
to get something for
Fendler - But I still
delay the Continental
sets.

I greatly doubt if
Vilmorin's tree actually
came from Montevideo 2.
heterophylla.

The "Atriplex" thing
you send = Alternanthera
bladhiana, Moq. (Amar.) Lamprosperma
Moq. in DC 13. p. 359.
- the desert country all
full of it. Ever yrs

Rec^d Jan 15^th
Ans Feb 25

Cambridge. Aug. 8. 1879
Saturday Evening

My dear Engelmann.

Yours of Aug 3^d is in hand.

First about the grass, Sesleria ductyloides, Nutt.

I very feared the mate in Emory's Report, & grieved the genus.

In Whipple's Report he has still let it stand, tho. I had pointed out to him that in Torrey's account of Sargent's coll. it is enumerated under the name of "Calamitheca ductyloides, Kth. — Nutt. Sesleria ductyloides, Nutt. Pers. &c." — Now Kunth has no such name. So I take this to be Nuttall's pass. name in Kth. Stock,

Again, — another equally blind clue, I have the (male) plant in Hartweg's coll. Mex. no. 250. —

0 1 2 3 4 5 6 7 8 9 10

MISSOURI BOTANICAL GARDEN

Turning to Benth. DC.
Start up. [which I think
you have: if not I will send
you a copy.] I still having a
duplicate } I find it indeed
on p. 28. = "sp. 2 v Triodia
sp.?" = But in Carajas,
p. 347. "Lasiostega humilis
Rupprecht (ined.?)" — And
Steudel's recent Gramina Stapfa
has nr genus Lasiostega.

That is all I know
I have nr female flowers
and nr evidence that
any body ever saw them,
here

But now, your little
sketch makes me guess
that your female flowers
may belong to Mitchell's
Leptochloa dichotoma = Uniola,
Torr. in Marshall Rep. Can this

MISSOU
BOTANIC
GARD

it = Michx. 1873. = Buckley's
"upper Miss. which I was
named for me" Echinosparmum
paturlum, Lehm. Exactly like Watkins'
plant."
= Clear water, Ozarks. Mrs. Mrs. Spalz
ding.

Then I have the same
thing? (but without the
dep pit?) from Ozarks Shuck,
ticketed by Blanchan when
Watkins Curator
"Echin. sp. Redowskii, Lehm.
— paturlum, Hook. Fl.
Bor. Am. am Ledeb."
Or, see what you can make.
It is in Sargent's Platte
Coll. but I cannot now lay
hands on it. [Hook, b 34. Jun also
names E. paturlum]
Buckley got another —
which Torrey named "E. Hec
mentii. n. sp." I send print.
It is near E. Lappula.

I wrote to Dr. Hayden to the same purport that I wrote to you last, and paid I would send his whole Platte collection on to you, after running through it, & naming as well as I can the plants I know in it —

I enclose his reply — It will be better for him to take out a set for you — for the collection is put up in a bulky way, filling 5 thick parcels — the same thing over & over. for it would cost more than the things you get would be worth. I think he will send you a set — which you ought to have —

My wife has lost strength & flesh during the past year — is quite run down — tho' not in dyspepsia as formerly — I do not feel at ease about her.

Ever Dear affectionate
A. Gray

MISSOURI BOTANICAL GARDEN

Machaeranthera. I have no confidence in Nuttalls various species, nor in size of head — All are to me M. canescens.

"Liatris Drummondii" — Very small, and confining Torrey, who says it is annual, Hayden has it in plenty from the Platte, — with head or ligules less.

"Liatris squarrosa Linn." I believe it is only L. angustifolia. MS. — I will look at Linn. in the morning of Monday. — The Texan plant = the Missourian. = pl. of Mead from Illinois, which is, no doubt L. angustifolia.

[Hayden has L. Mandanensis also — larger, yellow corolla.)

"Aplopappus squarrosus Torr." (ex Torr. ips.) = "Grindelia squarrosa" Dunal. Torr. = Hook. b 31, ex-Torr.! —

No Market
St Auditorium 15. March 10th 1879

Dear Engelmann

I have
yr Feb. 21 — some time
ago — about Mex. Ferns
for Asst. Missionaries.

I have applied to some
other botanists, who are
in the habit of wanting
me to get them. Papers
for them, whether they
will join the order,
and then I will give it
out. — From what you
say about the binding
I suppose there is not
much hurry.

I have reported on the
Report & Synopsis to Secretary
of Smithsonian Colorado Expedition

I sent the rest to Torrey long ago — It was a small collection of Hayden's things which I run over hastily and named on the labels I have not list. Hayden said he was about to take up the coll. & would send you a specimen of every thing with the name finished by me.

You will find many things named wrongly. I see now I had not time to study them.

I thought I had put into that box of grass up Yellowstone — 3 years ago a copy of P. Stantonef. It seems not. I must have

MISSOURI BOTANICAL GARDEN
GEORGE ENGELMANN

0 1 2 3 4 5 6 7 8 9 10
cm

Cambridge 23d April. 89

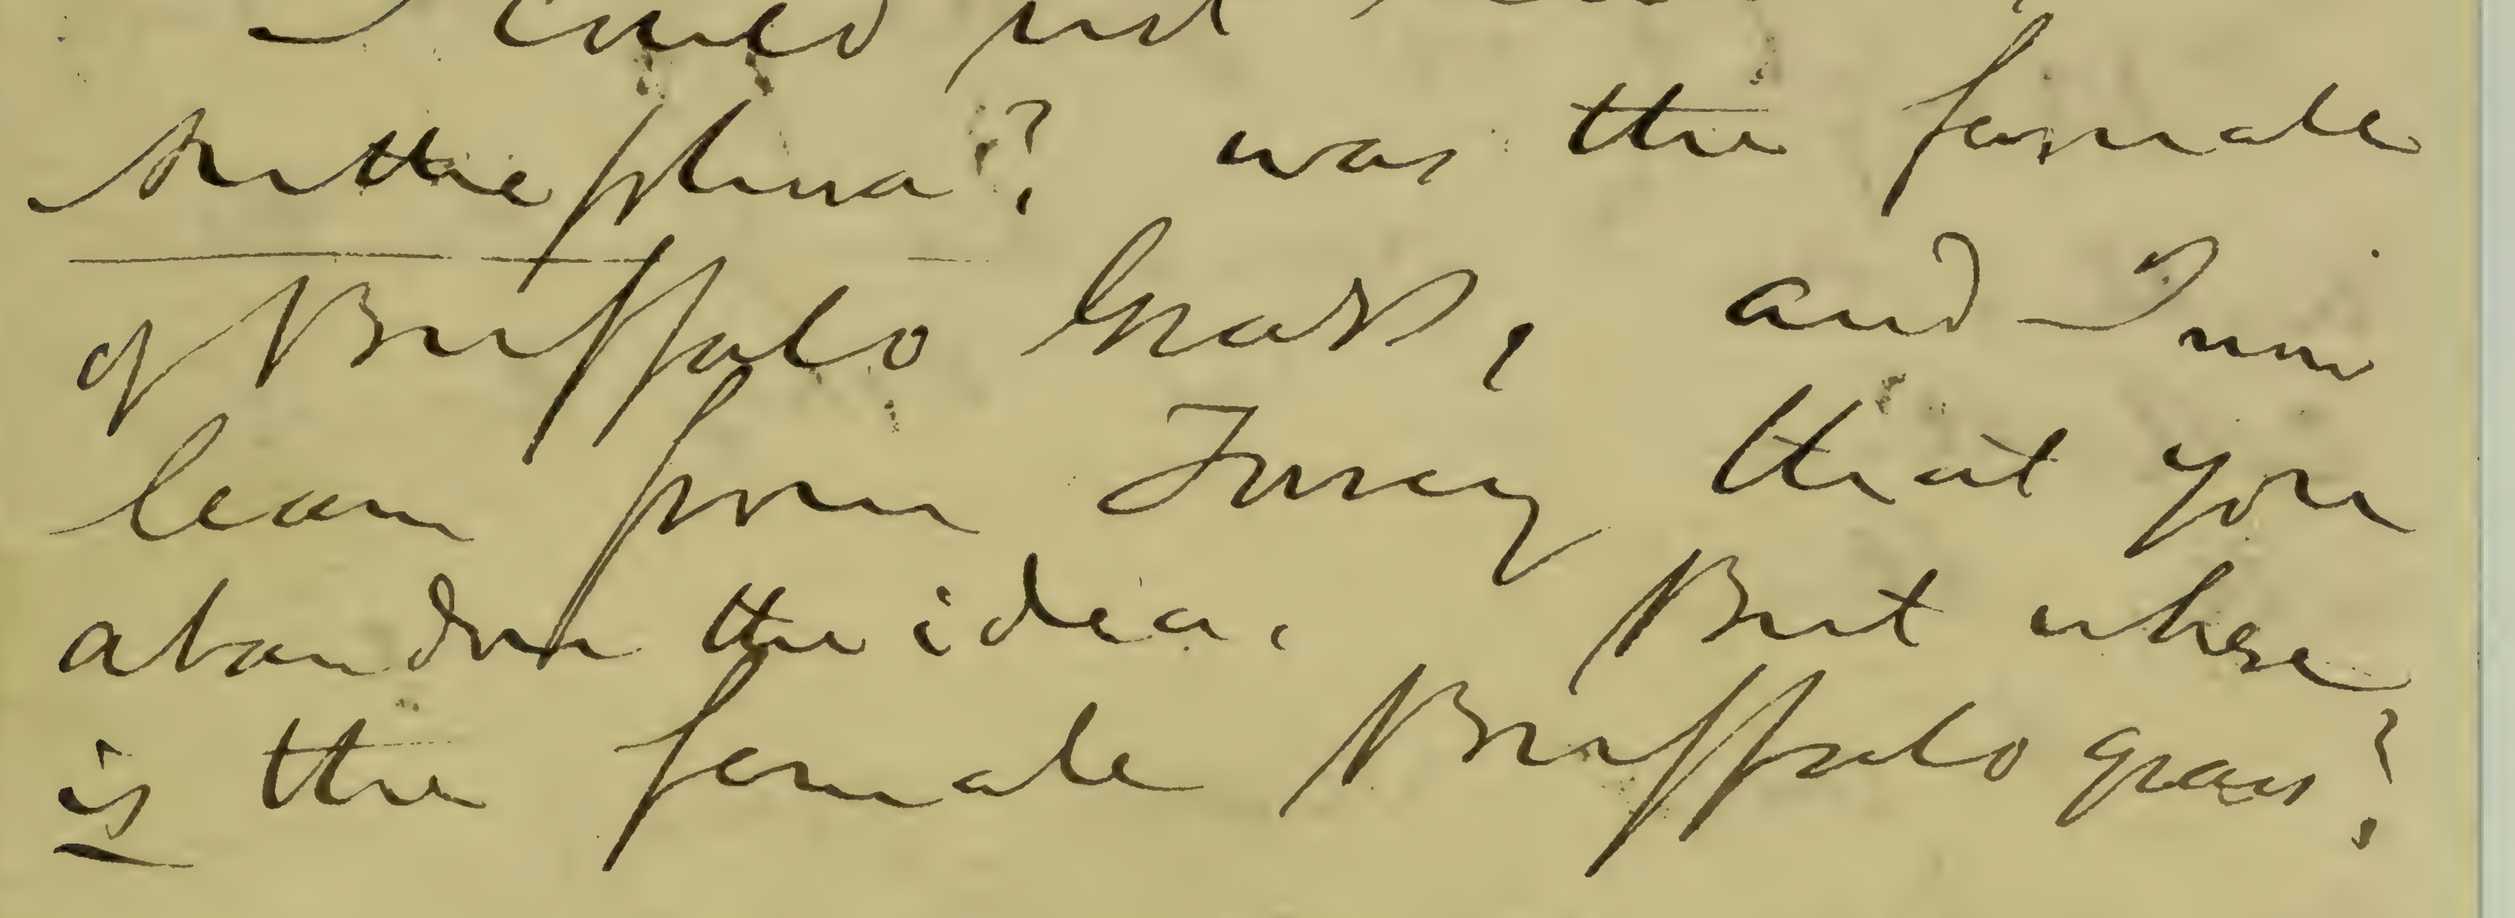
My Dear Engelmann -

Yours of the 15th and the seed came today. Many thanks and I return the stamps used.

I ran on to N. Y. with Mrs Gray, and left her there to make a visit, to see if she could recruit a little. For she has got very much run down this winter. She is now anxious for me to return. What the exact trouble is we cannot say; general feebleness, & a quick pulse - except when she gets a dyspep= tic turn, when it comes down at once to 60 -

I expect her home again in 10 days

I could not believe that Northern Illinois was the female of Bos Bison, and I am glad from Jones that you abandon the idea. But where is the female Bos Bison?



copyright reserved

Jenny asked me to send
you some seed of the plum
but I have not the space.
I sent him P. de Beaux.
Agent. out of which to
copy out by tracing
the analyses. & send them.
That must be Leeds
variety. The styles must
be looked to. I am re-
luctant to suspend at united
styles in Melanthaceæ
after a Japan thing
which is just Veloziaceæ
but with the styles united.
and even the stigmas. into
one.
Might is getting on Vera
well, and making a good
collection — is very emphat-
atic there.
I am sure glad you
to order your Ptelea. Japan.

MISSOURI BOTANI
GEORGE ENGELM

I shall get it in a few weeks after ordering. The longer it has been used the firmer it becomes & better.

But — as it is always better and sufficient to match what we have once got, let me suggest to Mr. Shaw to order more

12 reams opens ever well & very small, but 24 reams of plant paper, = practically about 11000 sheets — you will very soon use up. Even Eaton is going to order 25 reams in continuation of his last and I rather have 10 or 12 on hand — as much more.

TANICAL GARDEN

Dear Engelmann

Yours of the 13th came this morning, and I will hastily notice it, pertaining for I have much to do now.

I think you can buy the 1/2 volume or part of Mem. Amer. Phil. Soc. vol. 7 m.s. which contain Nuttall's Arkansas papers. Try them. Mr. Pennington Antiquarian bookseller — Or, shall I try for you.

Well, even $10. or a year is much better than nothing for the Botanical establishment. I wish we had half of that.

I will do anything I can in the way of asking

information to Shaw's lawyer, when he comes. Don't hurt in Washington before hand with any views which you yourself think important,

If you can send them, you should send. Oaks to S.C. Temple Smithsonian. But I mean to send a box from here direct, via Paris (Delessert) which will cost me less than to send to Washington.

Now I will order the herbarium paper, and increase your portion as requested.

If Shaw will be

liberal in his establish-
ment, why not turn over
to him your general buke-
If I had me I could
have free access to
always. I would not take
the expense & trouble of
keeping up & increasing
one myself.

Methinks should come
into direct communication
with Eaton, who will
manage all Farm-exchanges
& is active, & I think
would be glad to supply
him with Hand Cor Replicates.
Write to him at Newhaven.
I will see that at N.
has a full set of Mrs Lees
new Britains - which

BOTANICAL GARDEN
BLMANN PAPERS

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved

will probably contain all the former ones.

Dr. you have made the capital discovery, and proved the so-called Nutta plum to be the fruit of Buffalo-Grass. I could not have believed it without direct evidence.

I can not study it (it would take me a long while to get the care of before me that my opinion about the affinities of the Grass would be of any use); but it is most interesting, and I beg you to work it out in detail and thoroughly.

Barbacoüe (or Barbacoua would be a good meaning name, indeed — the former not very good — as the accent would fall on antepenult.

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved

Acc: May 24 1859 18 May '59 112

I do not remember that there is any name that need stand in your way. Hooker publishes, you know, "Balanitheca Indica Kth." Mr Kunth has no such name. — I presume it is a slip for Nutt (in herb. Hook.) But that is only a guess of mine. The name to is unmeaning. And in a new genus, three names "Dactyloides" & axilliflora" might be passed by. But I go for sticking to the old names when it can be done. I offer no opinion on this point now. Can I help you about the Opuntias?

I have not time at this
moment to find out what
just said Bridgesia
(in all its species) is meaning.
Ask again, if you want
me to hunt it up.
Cragnitis nepetans is
also Liaeiana, or Liacis
dimorphans.

MISSOURI BOTA
GEORGE ENGE

I send you answer —
by mail, the sheets
of Fungi. Might — &
some other matter,

I send your sketch, &
your whole letter to Torrey

Rec'd Sept 11th 14

Cambridge Dec. 6th June 1857

Aug June 15th

Dear R.

In my last I meant
your letter of June 2d —
and this morning I
went to Boston & there
ordered the Northern papers.
(Shan't) I shall little idea
be annoyed to take the Spruce
collection.

Shaw is very kind
to give $10.000 out of
an income of 15.000. —
Perhaps he will do more
when he gets under
way. Sunday he
ought to take Hawkins'
collections — & became him a
a Curator, & his Curator
Place.

As to your. Our Lady

I think you are right for the present, keep your own, — arrange it on paper of size of Shaw's, but look to an eventual combination — either in Shaw's life time or after & and be open to propositions from Shaw; as for example, to take your whole herbarium — provide for maintenance & increase — and when ready, to make over the use of the whole concern. This latter must depend upon you, and when it does — with a decent salary, you could

MISSOURI BOT
GEORGE ENGE

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved

reside up there — there
physic to the dogs —
or only to the asses
in consultations — and
have time to do your
justice in Britany.

TANICAL GARDEN
ELMANN PAPERS

Meanwhile, if there
would take your books
upon proper terms, you
might at any time
have any particular
families with you, in
your house, to work at.

Better send your books
to S.C. by Smithsonian
Institution — where
will be packing next
month — with some
more sharps
shus ways, but safe.

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved

Dear Aunt Lizzie
your proposing a
new name for
Buttalo Grass
I rather approve it,
and assume Buffera
(or Buchloe) as
much better than your
former suggestion —
As I do not think
Scaly Grides very much
objectionable I should
incline to keep it; but
I see no sufficient
reason to protest against
Buttalo. There are
some good reasons for
it, and good answers
to protest it. (Use your
judgement.

2 6 June '59 Act 2 June 11th 1859

As to the other, matter I do not know who gave that name Bloxam this — and I advise you to ignore it altogether, under the circumstances. And I like Monmouthshire, very much.

I asked Munro what he thought of Monmouth — & he said he thought it (Cholmondeley) is Mrs Jones or Mrs Williams & has notes on many Britonia. I shall put till then what you are writing at, but you can consult him if you like. I suppose

he may have seen
the Texas Grass in
the Herb.

I am glad you
will write this paper,
for it pays, & pulish
ligures. You will
pulish you pay at
St. Louis.

If you cannot
get the (your drawings)
put a stone in St.
Louis. I could go to it
for you in Boston.

I have not seen, &
cannot get out a copy
of the Boundary Survey.
nor has Torrey received
the extra copies, which

MISSOURI BOTA
GEORGE ENGEL

Dear L.

I have written to Philada.
for Mitchell's paper on Arkansas
Lepa. i.e. the part of Spec. Phil.
Soc. which contains it.
Till Brisbin he will find
that paper. in the proper vol.
(5th) of Trans. Amer. Phil. Soc.
in the Library of Soc. Phys. et
Hist. Nat. Geneva.

Shameful is the verdict
in the Strain case — Will
doubtless be set aside. If more
moderate it might have stood.
Is there any evidence of bad
character really?
I possess the specimen of

Stuttgart no. 250 - which you
see, on p. 28, Benth. calls
Nicotiana No. 1 on p. 347.
appears, he says (= Nicotiana rustica)
"no. 250. Lasiostega tenuis =
lis. Rupp. (ined.?)" Evidently
Evidently named in a letter
as he says known on the page
"Rupp. in litt." & other things.

I must go a - long
to Stuttgart, & shall go
p. 333 to end (thought
I had sent them before)
and send Nicotiana in
it. If it fails or
crushes I will put in
pigeon-hole for you.

My Dear Engelmann

Your letter is done, and by this time shipped to St. Louis, and addressed to Mr. Shaw, as instructed.

The lot of <u>white</u> oxen are 48 rams by 1/2 —

Quality &c— judging from the samples I examined, <u>good</u> — no mistake about it except that it is dead white, instead of the very slight yellowing of sample. I have

called, but the fault
is trifling.

The paper gets stiff
when a few months old.

Remember that if
paid on delivering there
is a discount of 5 pr. cent.

If you choose to pay
it, or your part of it
through me, I should like
you to pay seventy-five
dollars to Hendler, and send
me his receipt as part
of your remittance.
This would save trouble
and exchange.

I have despatched a
box to DeCandolle, and

Cincinnati O. Aug. 1862

Dear C.

Just back, wife and I, from a visit to my mother in N. York state — and staid 3 days at Springfield, on return. Science pr — pr. — Jersey Thine — Ps. 2 —

I will pay you the $3. or $6 — as it may be (2 years.) and deduct from what I wish to send Hendon. I have only a trifle at present in my hands for Hendon, but think I ought to advance for some which I shall receive are long — the delay being caused by me — I have had company on

hand, and will send $70—
with this. and you
may also pay to him
the $6— which I shall
pay Lorenz (Secretary)—
for you, when he returns.
from Springfield.

In the Parks are printing
N. I hope soon to see
also the Executive

There is still plenty of
time for sending your
Parks & Dickens to be
bound, — as Smithsonian
envi will not be made up
till October.

Mr Tiffany dropped in
2 weeks ago — paid his
invoice and was written you

to elicit the information required. I promised my best attention. But have heard nothing since.

Mr Shaw has lately written. I enclose his letter to you. I have just replied to it, expressing a lively interest in his projected establishment and offering my best services if he requires them in the way of advice or suggestion. I hope it will be all right in the end.

BOTANICAL GARDEN
ENGELMANN PAPERS

Mrs. Gray is still rather poorly and thin. Remember us affectionately to Mrs. Engelmann and Georgy.

Ever Yours

Asa Gray.

Dear Engelmann

I have had for
some days the pl.
sheets of your Tussacia
Struvii!

Send me by mail
some ripe pods and
seeds
of Houstonia coerulea,
Beck!

I have no
seeds ripe.

are the ped. connecting parts reflexed or spreading

I am going to clear up
that species"-(or mixed up
with H. patens) & restore the
genus Houstonia! A.G.

Roanoke Va. Sept. 21/57

My Dear Engelmann

I have had your
letter 12th for some days,
but have been too busy
to write. I sent you a
hurried line the other
day. I forgot to enclose
in it your receipt for
$6. for Lorenz. You
still owe for the cur-
rent year, but no matter
for that before next
spring — when the Pro-
ceedings are issued.

Under the circumstances,
I should drop Rafinesque's
name Cuscuta Pentagona
merely mentioning, under
C. glomerata, that it is prob-
ably Rafinesque's plant,
but does accord at all
with his description.

It is an old law that
in Nat. History
M.S. collections x go to the
custody of the Smithsonian
Institution — and is a ~~good~~
good plan. They only
want one set, and will
allow the duplicates to
go where they most
be most useful. &

What a pity your
brother lost his collection!

I have been curiously
pressed upon every hand to
his acts as if his boundary
fence would be on your
Washington in a week
or so — His has gone
on for a months. — and
now I really don't if
we shall ever see them. —
What the pitch is I
cannot find out.

As to the incidental
notice of your bactacae,
really I had no idea
of over-praising, or of=
finding your modesty.
I think what I said
is all natural and
right.

CAL GARDEN
ANN PAPERS

It is proposed to put,
Sunny to mist — eat,
Nat. Plants, and yet
Hunter to do it,
You may be asked to
recommend it.

I must look at your
Parmychia thing by
day-light
I do not know how
you range the Brigtt ones
ours But we have an
interesting one — from Kennebunk
on the edge of Maine —
just sent to me alive! —

If you like and a specimen in this letter — if not, next time.

Almost or quite in flower.

Leaves thick-cellular, tubulate, narrowed

Flowers all seem perfect;

Stam. 5—10. Short. Petals imbricated in bud,

Fruit, as you will perceive, oblong, obtuse, with a short incised beak, surrounded by a membranous, thin wing.

What is it to be.

We are repairing the roof & other parts of the house, & putting in gas, — much upturning

Mrs. Gray sends her love and asks after Mrs. E. & Grace. How are they? Asa Jr is expected home to-morrow. has had a nice time.

Ever yours Asa Gray

Mr Lesquereux

Just as I write last
I get your Grass paper.
Very interesting — very
well done every-way.
The English and
Vernacular as far as I
see. I have retained
the paper for Mr. W. of Hill,
Jamel, in some detail.
Thanks for the Stratonia
minima; it served my
purpose: and here are the
specimens "to be returned".
Chapman the infra-Alexandro-
Mai allied to Hypericum!
He has been in Vermont the
last 2 months or more —
His printing gets on slowly,
& I have seen little of it.

At Home Sunday 5th Nov. —

Dear E.

I got your last
short & business a
few days ago — Glad to
see that Jo done — I
shall take it over presently.
All gammon, that I
knotted do, dismemberment
Euphubia — I had not seen
it. Another cock that
crows up is that the flower
of Euphubia is simple!
And D.C. writes me as if
he thought it might be
so!

Thurber is working at his
boat. I hope he means to put
in Europan anthracites —
I told him to go E. to the
Mississippi for all plants which
do not cross it.

freely at his service in my
herbarium & library. At length
he got tired. — I did not much
like me to see his MSS. or
proofs — partly to save me
trouble, knowing my hands were
full enough, and partly to
save himself the trouble
of revising things which I
told him ought to be bettered
for there will be much
in this book not as good
as it ought to be.

I have printed some
Rubi & sent you — with vols. 2
& 3 of Amer. Association
to — I am deep in Com=
posite of (U. S. Expl. Exped.)

Ever yours

P. S. 7th Mo.

I add the Cupressus from
Mrs. Chapman's books
I remember that he said that
you had mistaken or confounded the
others some of his species.

Communicate with him about them
(Appalachicola, Florida), and
correct each item, making
him send you any you need),
and any corrections you
have ~~to this~~ for these sheets
could be made on the plates.

Rec'd Nov 30th
At Hartford Dec. 23d Nov. 1859

Dear R.

Your favor of 19th came this morning. I stupidly omitted to send you p. 403. Here it is. Correspond with Chapman on the subject, and when you can correct & convince him he can alter on the plates.

Every facility was given Chapman here, and every assistance offered on my part. But he persisted not to consult me ~~in any~~ usually — after the first — & especially when he ought to have done it most. viz. after Compositae. & he did so partly because he saw it would take up much of my time, & partly because whenever he did I gave him more work, and made him do over again far more than he liked to do.

When he left, he told Eaton not to let me see the proofs except to solve his doubts in mere proof-reading. Nevertheless I stopped it in two places & sent the proofs to Eliza to do over — And there is a vast deal more that should be done over. Nevertheless, the book will

useful — yr his descriptions are generally original.

Send me the all you can like from your brother's collection.

I do not get letters from Thurber or Torrey for a long while.

Send to me a copy of your Oncata for Miller, which I will mail here or address

Dr. F. Müller, Director Bot. Garden Melbourne, Victoria.

By U. S. mail (ship) from Boston. The same postage will do it. I believe.

Glad you like revision of Publications generally and restoration of Boerhavia,

Agassiz seemed well pleased with all he saw in Switzerland — & elsewhere I have not heard him say the contrary. I do not see him very often now — shall give him your kind message when I do.

I have red the Inscriptions & put them right for Chapman. I sent for all Torrey's & sent him back a revision of the genus, correcting his mistakes & mine

The habitat of F. ligustrina in Mich, deceived me, in the manual.

The Missouri & Illinois plant is F. acuminata & diffa, ne = F. ligustrina.

If Torrey does not use my Mss. in the genus I will send for it & print it.

Thanks for note & Cake, happy new year to you & yours,

Ever Yours A Gray
